QCC Type 1 Connection

Item No.	Male Outlet	Female Conn – RH
G1851-A02	1/4" NPT	1-5/16" Acme

Connects the grill regulator to Type 1 valves shown. Provides 110,000 btu/hr excess flow protection & thermal shutoff protection for grill cylinders. After closure, bypass flow is only 10 CFH at 100 psi inlet pressure. The thermal shutoff occurs when the temperature of the plastic coupling reaches 240°F to 300°F and the material softens, allowing the check valve to close off the flow.
