Oxy-Fuel Safety Video

Don't take chances on safety! Learn safe cutting and welding practices with Smith Equipment's Oxy-Fuel Safety Video. This comprehensive 25-minute video takes you step-by-step through proper set-up and use of oxy-fuel cutting, welding, brazing and heating equipment. The video includes information on important procedures and equipment that can increase on-the-job safety. Ideal for schools, sales training, welder safety courses, refresher courses.

SET of 6 FULL SIZE POSTERS

\$59.95 Part Number SSP-1

1 "I never release the adjusting screw, takes too much time. Oops!"
Safety Rule: Always release regulator adjusting screw before opening valve.

2 "I told you, some of the welders were using oil on their regulators."
Safety Rule: Never use oil or petroleum base grease on regulators, inlet and outlet connections, cylinder valves, torches, fittings or other equipment in contact with oxygen.

3 "When you light up, you don't miss much, do you Jonesy?"
Safety Rule: Keep heat, flames and sparks away from combustibles.

4 "Blast! I must have forgotten to chain my oxygen cylinder."
Safety Rule: Secure and locate all cylinders to prevent them from falling, dropping or being knocked over.

5 Can you see the 37 (or more) safety violations shown here?
Safety Rule: Know and follow all safety rules and practices during welding, heating and cutting operations.

6 "There goes Lumis now... and his theory on using oxygen for ventilation."
Safety Rule: Never use oxygen as a substitute for compressed air.
