

**THE LITTLE TIPS TORCH™**

Size

**A Word About Sapphire Tips**

Due to the extraordinary orifice diameter of tips sizes #2-3, they have been fitted with a synthetic sapphire to assure accurate gas flow and improved flame characteristics. *All tips are 100% flame tested.*

**Variety of Flame Settings and Sizes**

Produces a perfectly controlled, stable flame hot enough to melt commercially weldable metals, glass and ceramics with thread-thin flames up to 6000° F.
