FLASHBACK ARRESTORS w/CHECK VALVES

A backfire or flashback occurs when mixed gases are ignited in the torch, hose or regulator. Flashback arrestors are designed specifically to help prevent and stop these dangerous situations by preventing reverse flow of gases and quenching backfires and flashbacks at the torch or regulator.

Color Coded for easy Identification

- Stops backfire and flashback by quenching the flame at the torch or regulator
- Built in check valve (preventing reverse flow of gases)
- UL Listed
- Available for torch and regulator
- Sufficient flow to cut up to 10"

3/8"-24 "A" SIZE	
Torch End	
FA-80 – Oxygen	\$49.95 EA
FA-81 - Fuel Gas	\$49.95 EA
Regulator End	
FA-90 – Oxygen	\$52.95 EA
FA-91 - Fuel Gas	\$52.95 EA

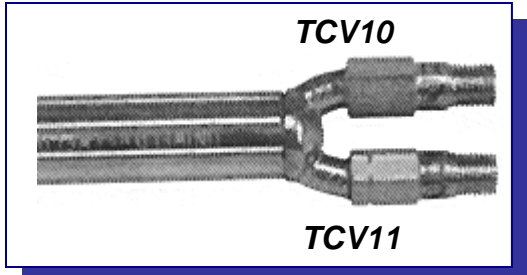

9/16"-18 "B" Fitting				
Single	Regulator Part#	UNIT PRICE	Torch Part#	UNIT PRICE
Oxy	RFA100	\$37.25 EA	TFA100	\$35.50 EA
Fuel	RFA101	\$37.25 EA	TFA101	\$35.50 EA
Display Card Set of (1) Oxy & (1) Fuel	RFAB	\$67.00 EA	TFAB	\$63.00 EA

Flashback arrestors should be installed at the torch to help protect the technician and at the regulator to help protect equipment and cylinders.

ONE PIECE CHECK VALVES WITHOUT FLASHBACK ARRESTORS

- Helps protect against reverse flow of gases
- Conforms to OSHA safety standards, UL Listed
- Easy to install, test and service

Single	9/16"-18 "B" Fitting				3/8" –24 "A" Fitting	
	Regulator Part#	UNIT PRICE	Torch Part#	UNIT PRICE	Torch Part #	UNIT PRICE
Oxy	RCV100	\$9.95 EA	TCV100	\$9.95 EA	TCV10	\$15.90 EA
Fuel	RCV101	\$9.95 EA	TCV101	\$9.95 EA	TCV11	\$15.90 EA
Set of (1) Oxy & (1) Fuel	RCVB	\$19.45 EA	TCVB	\$19.45 EA	TCVA	\$30.95 EA

Check valves provide added protection against reverse flow of gases, but not flame flashback. They should be tested for leakage and flow regularly.
