HOSE REPAIR KITS are designed and stocked for quick hose repair in shop or field. Kits are available with a choice of Crimping Tools and necessary fittings for each tool. Convenient plastic case is durable and includes a full color label and description chart. (See previous page for more information on the crimp tools included in the kits)

Kits contain an assortment of hose nuts and nipples, splicers, coupler, ferrules and a choice of crimping tools.

HOSE CLAMPS / HOSE CLAMP KITS / PINCHER TOOLS

2-Ear Clamps

The one-piece design offers positive clamping action. The clamps are widely used on air, fluid, gas and steam lines. The closed "ear" geometry provides an inherent retained load and a spring action in the clamp, permitting expansion and contraction during thermocycling or vibrating conditions. For proper installation and seal, both "ears" must be crimped closed.

Note: When ordering 2-Ear Clamps, select nominal clamp size nearest to, but always larger than, O.D. of material to be clamped after insert has been fitted.

Please note: Once an OETIKER Eared Clamp has been applied, it must not be reused. Tampering is visible.

Service Kit
With Standard Jaw Pincher
Part No. SK-1098
\$98.50 EA

Part No. SK-1098 Contains:
15 of OT0709, 15 of OT0911, 12 of OT1113, 15 of OT1315, 15 of OT1518, 12 of OT1720, 15 of OT2023, 12 of OT2225, 12 of OT2327 Plus 1 pair of pinchers

Clamp Material – Zinc plated carbon steel.

Call Us – For Stainless Steel Clamps and other Oetiker Clamps, Kits, and Tools.

Standard Jaw Pincher
Part No. OT1098
\$32.78 EA

All that is needed – to either apply or remove O-Clamps and Band Clamps. Oetiker pinchers are forged from high quality steel for heavy usage. They are also handy for cutting wire, strapping, pulling nails, etc.

Rights to make technical changes in the interests of further development reserved by Oetiker
