CRAFTER SERIES

WELDCRAFT

Crafter Series torches use standard Weldcraft front end parts, your assurance of maximum performance.

D-Handle™ design improves torch performance without increasing size. Reduces hose abrasion. Built-in mounting for cable cover. Patent pending.

Integral double lip back cap seal (CS310) improves high frequency shielding and reduces gas leakage. Patent pending.

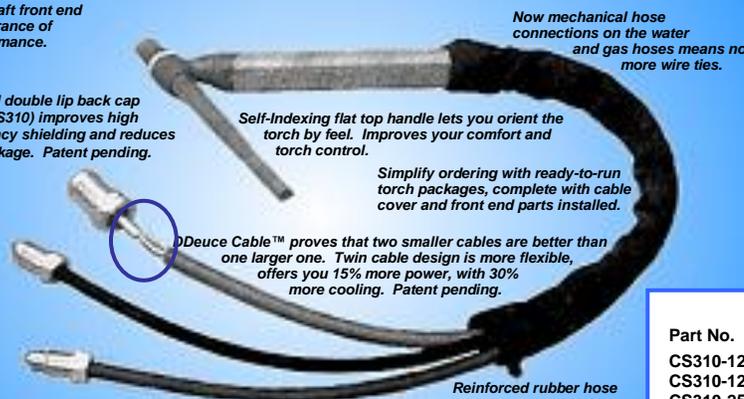

Self-Indexing flat top handle lets you orient the torch by feel. Improves your comfort and torch control.

Simplify ordering with ready-to-run torch packages, complete with cable cover and front end parts installed.

Deuce Cable™ proves that two smaller cables are better than one larger one. Twin cable design is more flexible, offers you 15% more power, with 30% more cooling. Patent pending.

Reinforced rubber hose sets are more durable than vinyl. Remain far more flexible in cold weather for easy handling.

ColorSmart™ color-coded hose sets quickly identify cold water, hot water, power and gas.

Now mechanical hose connections on the water and gas hoses means no more wire ties.
