\$17.58 EA

2 x 4-1/4  
(Flip Lens)

Part No.  
EH-24L

\$26.95 EA

## HUNTSMAN® WELDING HELMETS

The Huntsman began operations as the Huntsman Welding Shield Company in October, 1924 when Frank Huntsman applied for a U.S. patent for his invention of a locking device that improved the method by which a welding helmet could be held in a raised or lowered position. Since that time, over 70 years ago, the Huntsman® brand has grown to become a standard in the welding helmet industry.

The Company's name was changed in the 1940's to the *Kedman Company*, a combination of three names: "K" from Frank Huntsman's first partner, Robert Kimberlin; "ED" from a newly established partner, Zahnor Edwards; and "MAN" from Frank Huntsman's own last name. This event marked the beginning of a long and profitable relationship. Zahnor Edwards eventually succeeded his partners in becoming President and C.E.O. of the company.

Today, Huntsman is a division of Jackson Products based out of Belmont Michigan.

Throughout the years, Huntsman has never lost sight of our original commitment to the welding and safety industries.

They currently manufacture a wide variety of helmets and face shields that are sold to users in many parts of the world through a network of highly-qualified dealers and distributors. The Huntsman line features helmets in a range of styles and contours, with vulcanized fiber, thermoplastic, or fiberglass shells, especially designed for modern welding techniques and safety specifications. Today's products are lighter weight and stronger due to all-nylon construction; and, our patented Zahnlok® headgear adjustment system continues to be the best technique available to ensure a comfortable fit for the user.

Although the company has consistently grown to meet expanding business opportunities they have maintained their dedication to quality and service. While many processes are now automated to meet the demands of higher volume production, personal attention to detail is still a primary consideration in quality control and customer support.

### HUNTSMAN 400 Series

411P \$46.45 EA **Fabricated Vulcanized Fiber Shell**  
Resists slag best (Not to be used for overhead welding)  
Looses shape with moisture

Helmet with aluminum front and Zahnlok® headgear.

The lightest weight helmet in the Huntsman® line. This, the first Huntsman® welding helmet design, features the original Huntsman® shape and an aluminum glassholder in a vulcanized fiber shell. This type of shell is preferred by many welders because of its excellent resistance to heat. Since 1924 we've added our contour headgear with easy to use Zahnlok® adjustment to make the 400 series a comfortable, cool helmet for heavy-duty welding.

\$54.25 EA

430P

Helmet with lift front glassholder and Zahnlok® headgear.

\$49.45 EA

451P

Big Window® visibility with a vulcanized fibre shell. Vertical 5-1/4 x 4-1/2 lens.

\$58.65 EA

490P

Helmet with Quick-Slide™ "Flick-of-the-finger" glassholder and Zahnlok® headgear.

### 800 Series Leather Helmets

860P

\$92.10 EA

Helmet with lift front glassholder and Zahnlok® headgear.

860-2 (not shown)  
\$76.50 EA

Small size helmet with lift front glassholder and lace back. No headgear.

851P  
\$96.75 EA

Helmet with Big Window® lens,

### Roto-Clip®

\$10.50 EA

The Roto-Clip® hard hat adapter Lets you attach almost any Huntsman® welding helmet (with nylon lugs) to a hard hat. Patented positive locking device keeps helmet in any position you place it. 35013 fits American Allsafe Co.® Sentry III™ cap and Polyguard™ 35019 fits Huntsman caps 35096 fits Jackson® slotted caps 35097 fits ERB 6PT slotted caps 35098 fits MSA V-Guard®

951P \$31.25 EA

### HUNTSMAN 900 Series

**Ultra-light Thermoplastic Shell**  
General purpose – Holds it's shape with moisture  
A favorite with welders nationwide made of tough, washable thermoplastic. It includes our "contour-comfort" headgear featuring double lock locking devices and our patented Zahnlok® adjustment.

Big Window® visibility with an Ultra-light shell. Vertical 5-1/4 x 4-1/2 lens.

\$29.25 EA

911P

Helmet with aluminum front and Zahnlok® headgear.

\$37.95 EA

930P

Helmet with plastic lift front and Zahnlok® headgear.

\$24.95 EA

981P

Helmet with molded standard window and Zahnlok® headgear.

#990P \$42.39 EA

Helmet with Quick-Slide™ "Flick-of-the-finger" glass-holder and Zahnlok® headgear.

### MODEL # 4000 Cap Adapter

Attaches Model 400 series welding helmets to most styles of hard safety caps (hardhats) with or without slots. Provides for normal function and comfort of helmet while attached to cap and allows for quick and easy release.

\$8.50 EA

### 700 Series (Use solely for Fuel Gas Cutting & Welding)

711P  
\$42.75 EA

With aluminum glassholder and Zahnlok® headgear. Shipped without filter plate 2 x 4-1/4 Lens Size

751P  
\$51.50 EA

Helmet designed especially for Acetylene welding and cutting with Big Window® front. Shipped without filter plate. 5-1/4 x 4-1/2 Lens Size

### 117A HEADGEAR

# 117A  
\$9.50 EA

Plastic headgear that fits all Huntsman® helmets. Our patented Zahnlok® adjustment system allows the wearer to adjust the headgear in 1/16" increments to exact head size, simply by turning a knob. The adjustment is automatically locked in with 50 meshing teeth to ensure a snug comfortable fit that won't slip. The system is durable and long-lasting, because the teeth are automatically disengaged while the headgear is being adjusted. There is only one Zahnlok®!
