

SAFETY and FIRE EQUIPMENT - FACE SHIELDS (Visors) & WELDING GOGGLES

FACE SHIELDS (visors)

MODEL "K" FACE SAVER®

The model "K" face shield headgear provides the best comfort and adjustability, with wraparound foam cushioned sweatband and Zahnlok™ size adjustment system. The fit can be adjusted to exact head size in 1/16" increments. The contour-comfort shape provides greater comfort and security.

"Turn-button" visor attachment holds 12" or 15-1/2" visors more securely and provides fast, easy attachment and replacement. This headgear holds a variety of visors.

WILDCAT™ Shade #5

#3013714 \$16.50 EA

The Wildcat™ goggle offers extreme performance vision protection as it is constructed of material that does not melt, drip or ignite at 350°F for up to 4 minutes. The frame fits naturally to the contour of the face to assist in blocking out contaminants. Designed with optimal comfort in mind, the goggle features a pivot cloth headband for a custom fit. The soft cushioned eye cups (with Anti-Fog Lenses) offer a comfortable wearing experience. Side vents on the frame can be open or closed for work in most environments.

Clear #3013710 \$10.75 EA

Clear Goggles

What's the correct vent option for you?

VENT HOLES

Direct-Vent

Provides maximum air flow. Protection against grinding, chipping, and cutting operations.

VENT

Indirect Vent (SPLASH)

Protects against liquids and dust while permitting indirect ventilation.
