

AMPTRAK REMOTE CURRENT (AMPERAGE) & CONTACTOR CONTROLS

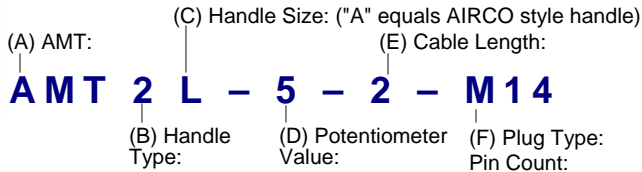

Remote Control, Rotary (CALL)

The Amtrak remote current control provides remote off-on control of the welding machine contactor and / or gas and water solenoid control, as well as full range remote current output control. A built-in strain-relief prevents the control cord from being pulled out or damaged. The Amtrak remote current control can be ordered either built into a TIG torch replacement handle or as a clip-on unit for retrofit to existing TIG torches or SMAW (stick) electrode holders, or in the velcro model where one size fits all.
