

HOW TO STORE COATED ABRASIVES

Maintaining proper Stock Room Temperatures and Humidity Levels is critical to the life of your Resin Fiber Disc. Improperly stored coated abrasives can lose as much as 70% of their production capability. And dramatic climate changes can seriously impair the quality of Adhesives and Backings and may cause irreversible damage.

Don't place coated abrasives near heat sources. Heat ducts, steam pipes, furnaces, ovens and any other form of heat generation may all cause extensive damage.

Keep away from chilled or damp surfaces such as walls and floors to prevent moisture damage.

Adhesive bonds exposed to high humidity levels may begin to decompose, causing usage problems such as grain loss, clogging and filling. Those exposed to verve dry climates may become distorted, brittle and inflexible.

We recommend keeping your Resin Fiber Discs in a stockroom with consistent temperature and humidity levels. Temperatures between 60 & 80 degrees F. and humidity levels between 35% and 50% will help keep your inventory in excellent shape.

RESIN FIBER SANDING DISCS

Premium grade extra aggressive aluminum oxide for best performance. Resin over Resin bond with tough vulcanized fiber backing. Closed coat for fast efficient stock removal and superior cosmetic finishing. General purpose applications including steel, stainless steel, aluminum, brass, cast iron, and auto body paint and filters - used dry only.

Abrasive Belt and Disc Cleaner
\$9.95 EA

PART No. 122008
SIZE 1 3/8 x 1 3/8 x 8 1/2

Adds additional life tool Clean belts and discs by holding against abrasive surface while running. Not for use with wide belts.

DISC CUTTER/TRIMMER

ALLOWS YOU TO ECONOMIZE BY REDUCING A USED 9" SANDING DISC TO A SMALLER SIZE SUCH AS 7" THEN DOWN TO 4 1/2" THIS IS POSSIBLE SINCE MOST DISC WEAR IS ON THE OUTER EDGE, WHICH IS CUT AWAY!

#9860 \$109.00 EA

PREMIUM ZIRCONIA, full resin bond disc with extra heavy duty backing. Self-sharpening Zirconia grain represents ultimate grinding performance, outstanding stock removal, cool grinding and maximum life. Best when working on stainless and alloy steels.

RUBBER BACKUP PADS FOR RESIN FIBER DISCS

Our rubber backup pads for fiber discs are medium stiffness and precision balanced. The reusable pads fit any portable sander. Your choice of smooth face for general sanding and polishing, or air-cooled, no-load, spiral rib ("S") face for extended disc life. Lock nut included with each disc.
