

INTERSTATE

STANDARD BLOW GUNS

INTERSTATE Standard Series Blow Guns do not include a bypass or restrictors to limit output pressure. These blow guns should be used with a maximum inlet pressure of 30 PSI. All **INTERSTATE** Blow Guns have a 1/4" NPT Female inlet and a 1/8" NPT Female outlet.

INTERSTATE

SAFETY BLOW GUNS

INTERSTATE Safety Series Blow Guns comply with * **OSHA 1910.242b and 1910.95** by using a tip that reduces the inlet pressure from a maximum of 150 PSI to an outlet pressure of 30 PSI at the nozzle. The tip also includes a safety by-pass which prevents excess pressure build-up in the gun if the nozzle becomes clogged or "dead-ended." All **INTERSTATE** Safety Series Blow Guns have a 1/4" NPT Female inlet and 1/8" Female outlet.

Cutaway of B300 Series Blow Gun

All brass internal parts
Rust free operation

3 O-Rings
Leakproof operation

Chrome plated cast body
Long service life

Bottom mounted nut
Allows field repairability

INTERSTATE Button Valves feature solid brass construction, and Buna-N (Nitrile) seals. Normal valve position is closed. Ideal for air and liquid lines operating at up to 175 PSI working pressure.

INTERSTATE Ball Valves feature forged brass bodies to provide extended service life and resistance to damage caused by extreme temperature applications. Inert Teflon seats and seals provide excellent corrosion resistance. Large handle allows more leverage for easy on/off operation.

HEAVY DUTY SAFETY BLOW GUNS

INTERSTATE Heavy Duty Safety Blow Guns have the same safety features as our other safety series blow guns combined with a heavy cast body for durability and long service life in the most rugged applications.

WARNING: Do not use Blow Guns on air lines that are not regulated, or when pressure at the gun exceeds 150 PSI. Use the correct size male threaded adapter with teflon sealing tape. Make sure gun is securely tightened to the adapter. Adapter must be threaded into the gun for the full depth of the female thread. Do not re-tap or modify thread for a non standard adapter. Use of these products contrary to specifications and directions may result in personal injury or property damage.

TIRE CHUCKS

The Air Line Chucks in this catalog are designed to exacting standards and are compatible with the industry standards for pneumatic applications.

WARNING: Chucks for "Live Air Line Only" have a built in shut-off valve and will not work on inflator gauges. Chucks for "Inflator Gauges Only" do not have a shut-off valve and will not work on live air lines.
