SELF-ADJUSTING SOCKET WRENCHES

Eliminate the time and frustration of searching for the right standard or metric sockets. Eliminate the cost of expensive socket sets. Eliminate replacing lost sockets! *Eliminate sockets!* The two-piece set of Atlas Self-Adjusting Socket Wrenches will fit 22 sizes of fractional and metric square and hex fasteners. The patented push-control

lever uses a worm worm gear to easily open and close the jaws. The jaws hold bolt heads securely until released. These

jaws apply a high, non-slip, torque to fasteners: the #8W (8" socket wrench) is capable of 800 in/lbs. of torque and the #10W (10" socket wrench) can handle over 1300 in/lbs. of torque.

#10W 10" wrench
7/16" to 3/4"
11 mm to 19mm

#8W 8" wrench
5/16" to 17/32"
8mm to 14mm

**\$59.97 PART
#S810W (SET)**

Atlas Self-Adjusting Socket Wrenches are sold only by the SET (#S810W which includes both the #8W and the #10W socket wrench) and are not sold separately.

CHAIN WRENCHES

"A" = USABLE CHAIN LENGTH

An excellent tool for pipe fittings. Chain wrenches can be used in many instances where an ordinary pipe wrench will not fit. Strong handles have I-beam construction Nickel chrome plated to resist rust. Double action Chain Wrenches work in both directions: CW12 has 15-inch chain; CW15 has 19-inch chain.

Cat. No.	"A"	PRICE
CW12	12" (305)	\$48.50 EA
CW15	15" (381)	\$68.80 EA
