Mouthpiece Cover w/Lanyard Replacement #093M-L \$14.95

Not Shown Female Fill Adapter SCBA Cylinder to HEED #346/347-H \$48.95

STANDARD REFILL ADAPTER

The Story of Submersible Systems, Inc. Submersible Systems, Inc. began in 1979 from the near death experience, of Larry Williamson, the President and inventor of Spare Air. He had an out of air emergency He was diving off the coast of Catalina on his first night dive looking for lobster when he experienced an out of air emergency at 140' below the surface. Because of this out of air emergency, Larry used his background in aerospace engineering and set out to make that "one extra breath" a reality for the diving community. After years of engineering and manufacturing several versions of Spare Air and HEED units, we have successfully pioneered the smallest compact air source in the world and gained popularity in the dive industry as well as in the military. The Helicopter Emergency Egress Device (HEED) protects air crew members from the dangers of drowning due to ditching an aircraft into the water and is used for the purpose of protecting shipboard members from inhaling dangerous and lethal toxic fumes of an engine room fire.

#920CM \$78.00 EA

This adapter is used to refill the HEED from an air compressor (capable of filling to 3000 psi (Insert Into yolk of SCUBA Fill

SPECIAL REFILL ADAPTER

#910CM \$51.00 EA
