

## 9700 BREAK RITE\* SERIES FIRE EXTINGUISHER CABINETS

9752 surface

9731 semi-recessed

### Features:

Heavy-gauge, galvanized steel construction  
Tempered safety glass far safer than standard plate glass during emergencies, and in case of accidental breakage  
Patented Break Rite™ nonremovable handle eliminates the need for hammer or breaker-bar  
Electrostatically-applied, thermally-fused, recoatable finish, for longer life  
9700 Series: Vandal-resistant, unitized assembly with provision for optional padlock or cylinder lock  
7000 Series: Keyed steel cam lock

### Benefits:

Longer life in outdoor applications  
Resists chipping, peeling and flaking  
Contents kept safe and secure  
Reduced accidental breakage

**METAL DOOR AND FRAME MATERIALS**  
STEEL—Cold rolled steel with electrostatically applied, thermally-fused polyester coating with recoatable white finish.  
ALUMINUM—Satin finish, clear polyester coated.  
STAINLESS STEEL—Number 304 stainless, with number 4 finish.  
BRASS—Polished finish, clear polyester coated.

**AMERICANS WITH DISABILITIES ACT OF 1990 - PROTRUDING OBJECTS** The majority of fire extinguishers, when hung on a wall, protrude more than 4" into walks, halls, corridors, passageways or aisles. To comply with the Americans with Disabilities Act of 1990 (ADA), objects protruding from walls (fire extinguishers) with their leading edges between 27 in. and 80 in. above the finished floor, shall protrude no more than 4" into walks, halls, corridors, passageways or aisles. Therefore, fire extinguishers that protrude more than 4" must be recessed into the wall.

### WALL MOUNTING

Great For Installation Of Extinguisher Wall Hooks, Hangers & Cabinets

\$1.95 ea

## Secure-A-Seal

Part No. TS \$89.92 per box

8" Yellow Box of 2,000 Multi-purpose Polypropylene

## Fire Extinguisher Safety I.D. Signs

Badger's range of extinguisher identification signs are designed to be mounted on must surfaces, providing a permanent reminder to assist with education and training in the use of extinguishers.

They feature fire classification symbols and an extinguisher color-coding system and are made from self-illuminating photoluminescent material.

- Incorporating:  
• ISO symbols and text for the identification of extinguishers, even when the lights fail
- Reduce the need for duplication of messages in different languages
- Provide 30 minutes of exceptional brightness during sudden power loss situations.

### 3-D Panoramic
